Project Title

Explore-US-Bike-Share-Data

Description

I used data provided by Motivate for three major cities in the United State. I had uncovered bike share usage patterns and compared the system usage between three large cities: Chicago, New York City, and Washington, DC. In this project, I used Python Language in writing script for computing a variety of descriptive statistics.

Files Used

- washington.csv
- new_york_city.csv
- chicago.csv
